Objective

I am an Electrical engineering student at Georgia Tech with hands-on experience in circuit analysis, digital systems design, and low-level programming in C and RISC-V assembly. Passionate about energy systems and hardware-software integration, with research interest in renewable energy technologies for space applications. Seeking internship or Co-Op opportunities in renewable energy systems and space exploration.

Education

Georgia Institute of Technology | Atlanta, GA

Bachelor of Science in Electrical Engineering, GPA 3.73/4.00

August 2025 – Present

Expected Graduation, May 2029

Skills

Programming: C, Python, Matlab, Risc-V assembly language.

Platforms: Developed and debugged in Linux.

Hardware: MyDAQ (Student Data Acquisition Device), ESP-32-C6 board

Software: Github, VScode

Languages: English (fluent), Chinese (fluent), Spanish (beginner)

Projects

Game Development | ECE 2035

Spring 2026

Developer

Individual based project developing a character's Flight, a real-time embedded game deployed on an ESP-32-C6 microcontroller with uLCD display, combining C programming, hardware I/O, and data structures.

- Implemented player physics, collision detection, and game state logic in C, integrating joystick and button inputs.
- Designed and debugged a hash-table based map system to efficiently track dynamic game objects across a scrolling environment.

Relevant Coursework

Intro to Software/Hardware Design: Execution and storage mechanisms supporting high-level languages; C programming and RISC-V assembly language; software design, debugging, and optimization on hardware platforms including the ESP-32-C6.

Digital Systems Design: Fundamentals of digital logic and abstraction layers from switches to programmable machines; Boolean algebra, combinational and sequential logic, finite state machines, number systems, memory, and introductory assembly programming.

Leadership or Activities

Science Olympiad | State Event Supervisor

August 2025 – Present

- Supervised Experimental Design event at the Georgia State Science Olympiad tournament, overseeing competition logistics and fair evaluation for 80+ teams
